

# Sprinkler: A Multi-Service Password Sprayer, Carleton Logo, Links to things

Sam E, Prompt E, advised by Jeff Ondich

## Usage of Password Spraying

Interpreting command line arguments

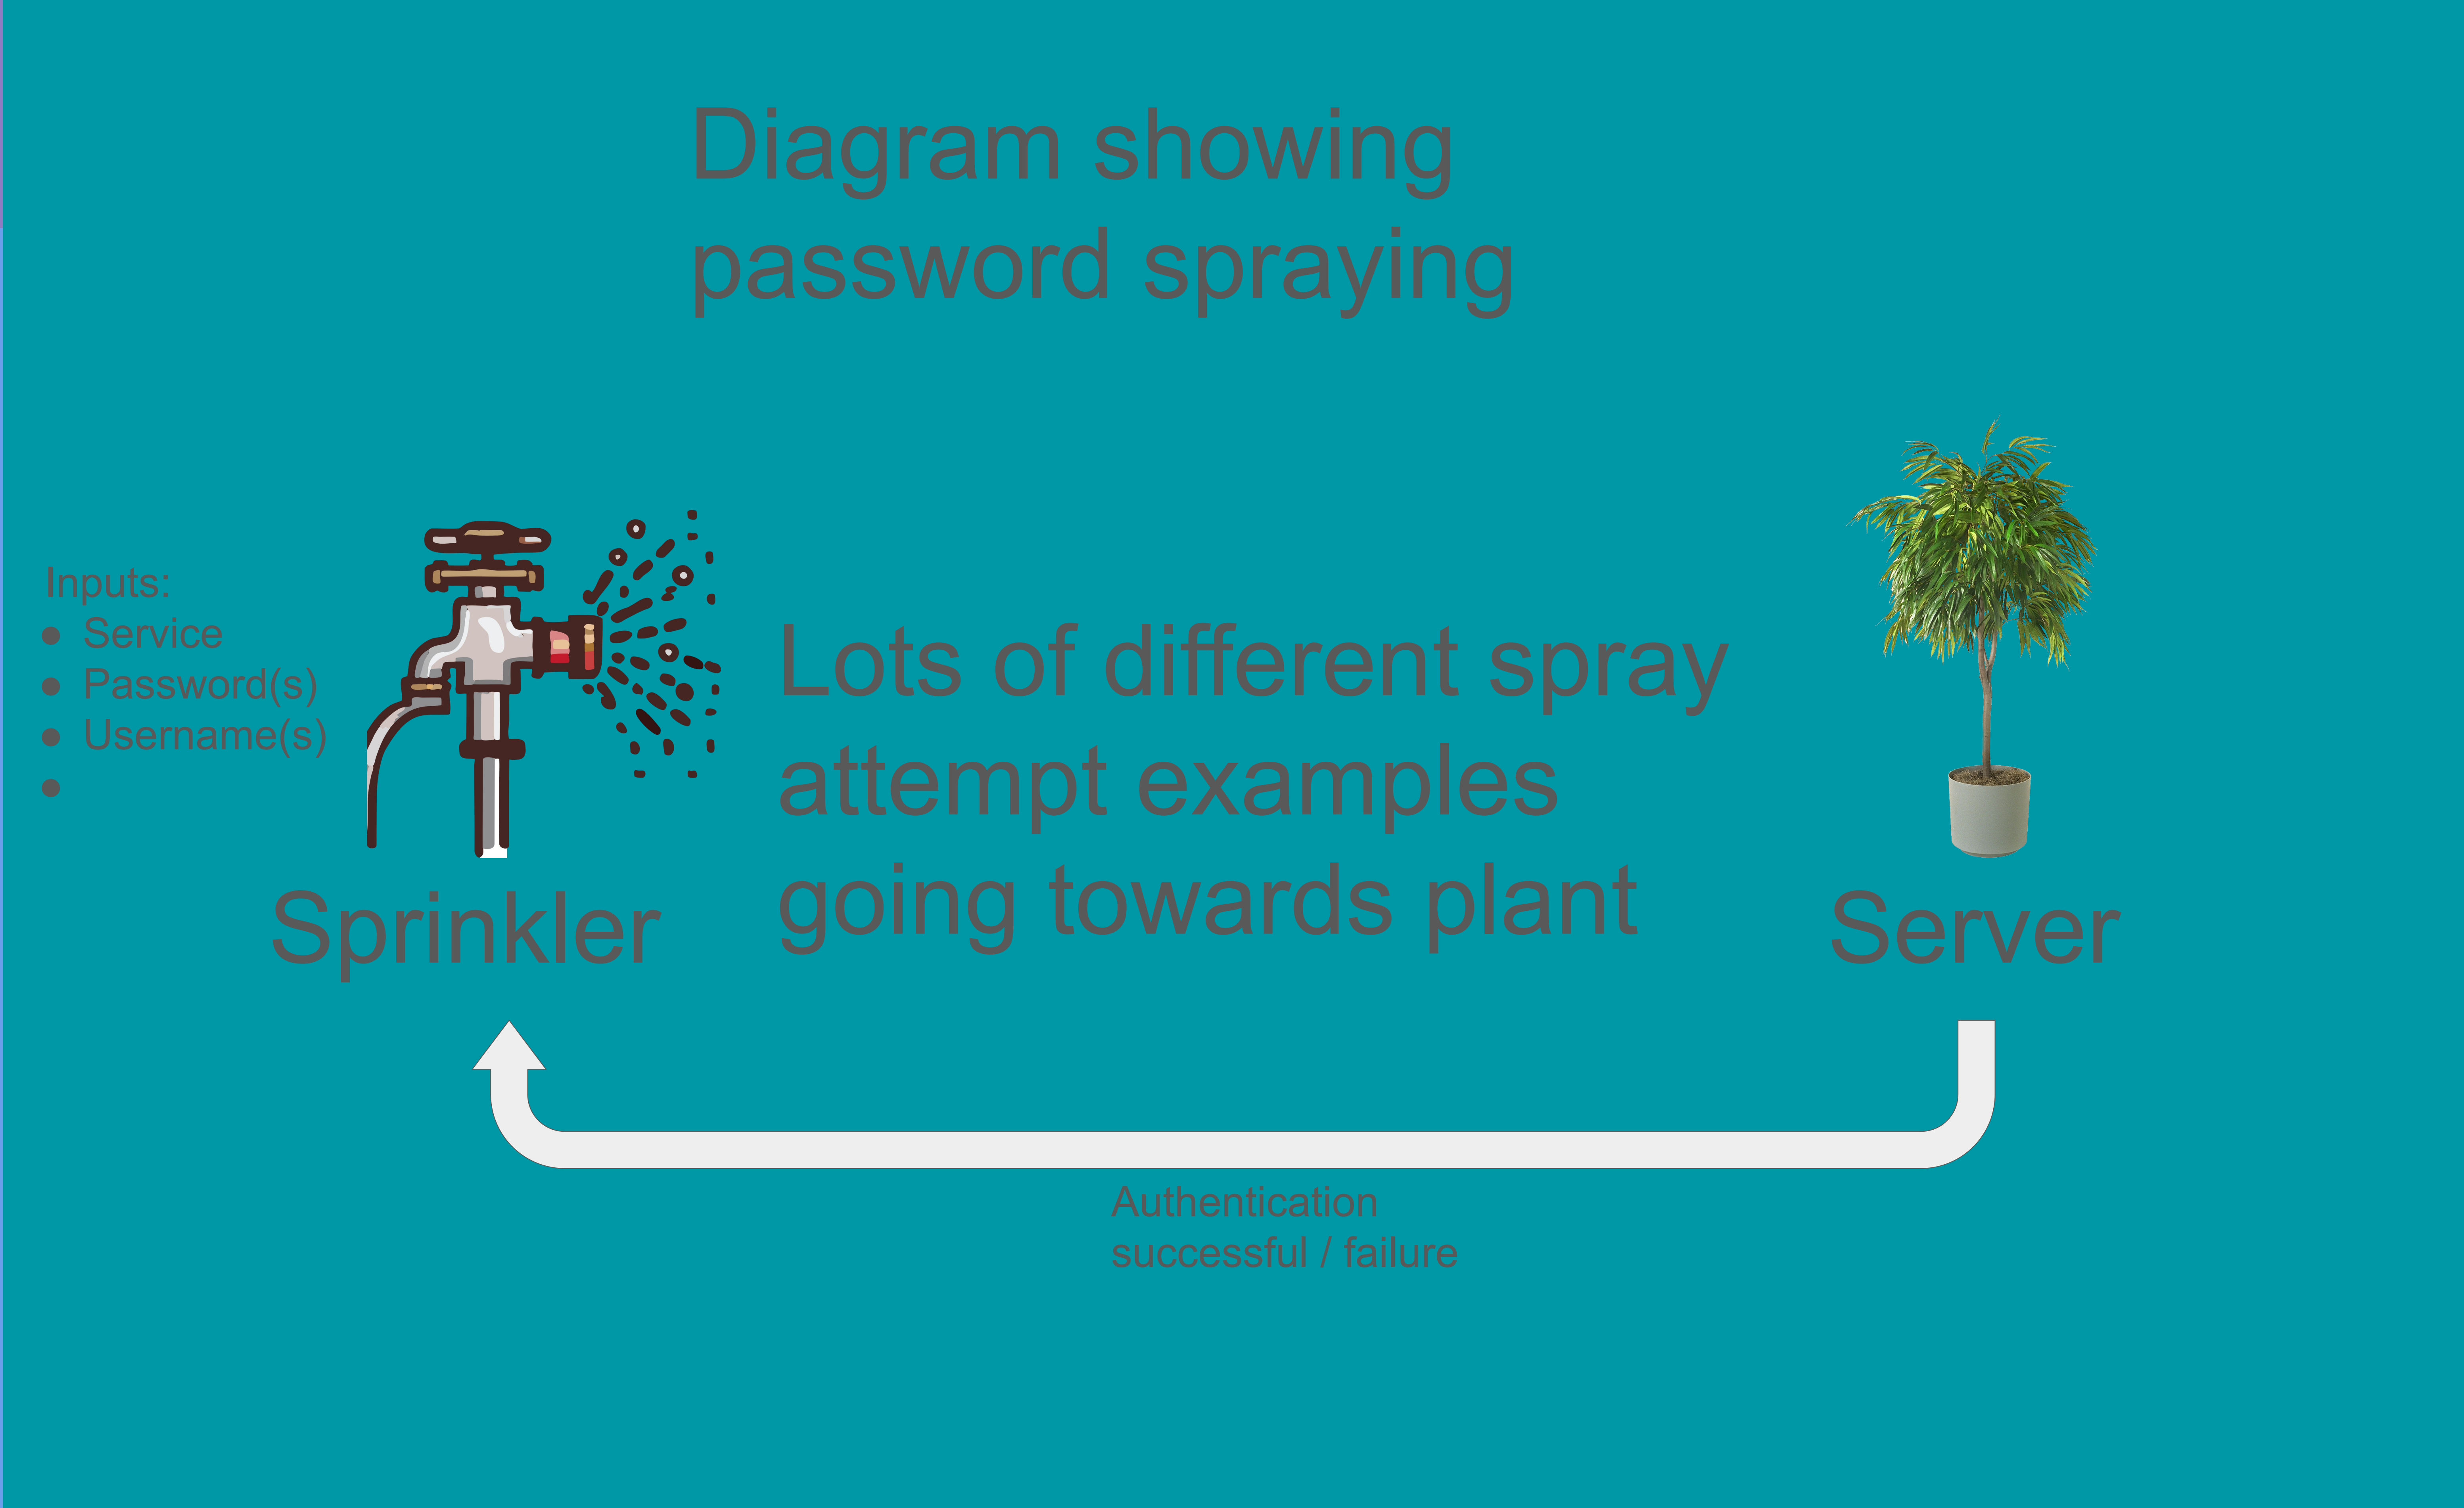

Spraying through an ssh service

Spraying through an HTTP-Get service  
Basic Authentication Method:

Spraying through an HTTP-Post service  
or something else (we want 3)

Output formatting and readability:  
Whole lot of output, it's important to make it pretty and readable.

Visualization of password spraying with accompanying explanation.  
Font probably pretty small at about 40pt.

Textual explanation of how password spraying works, alternative to the visual above.
