

Sprinkler: A Multi-Service Password Sprayer, Carleton Logo, Links to things Sam E, Prompt E, advised by Jeff Ondich

Usage of Password Spraying

Interpreting command line arguments

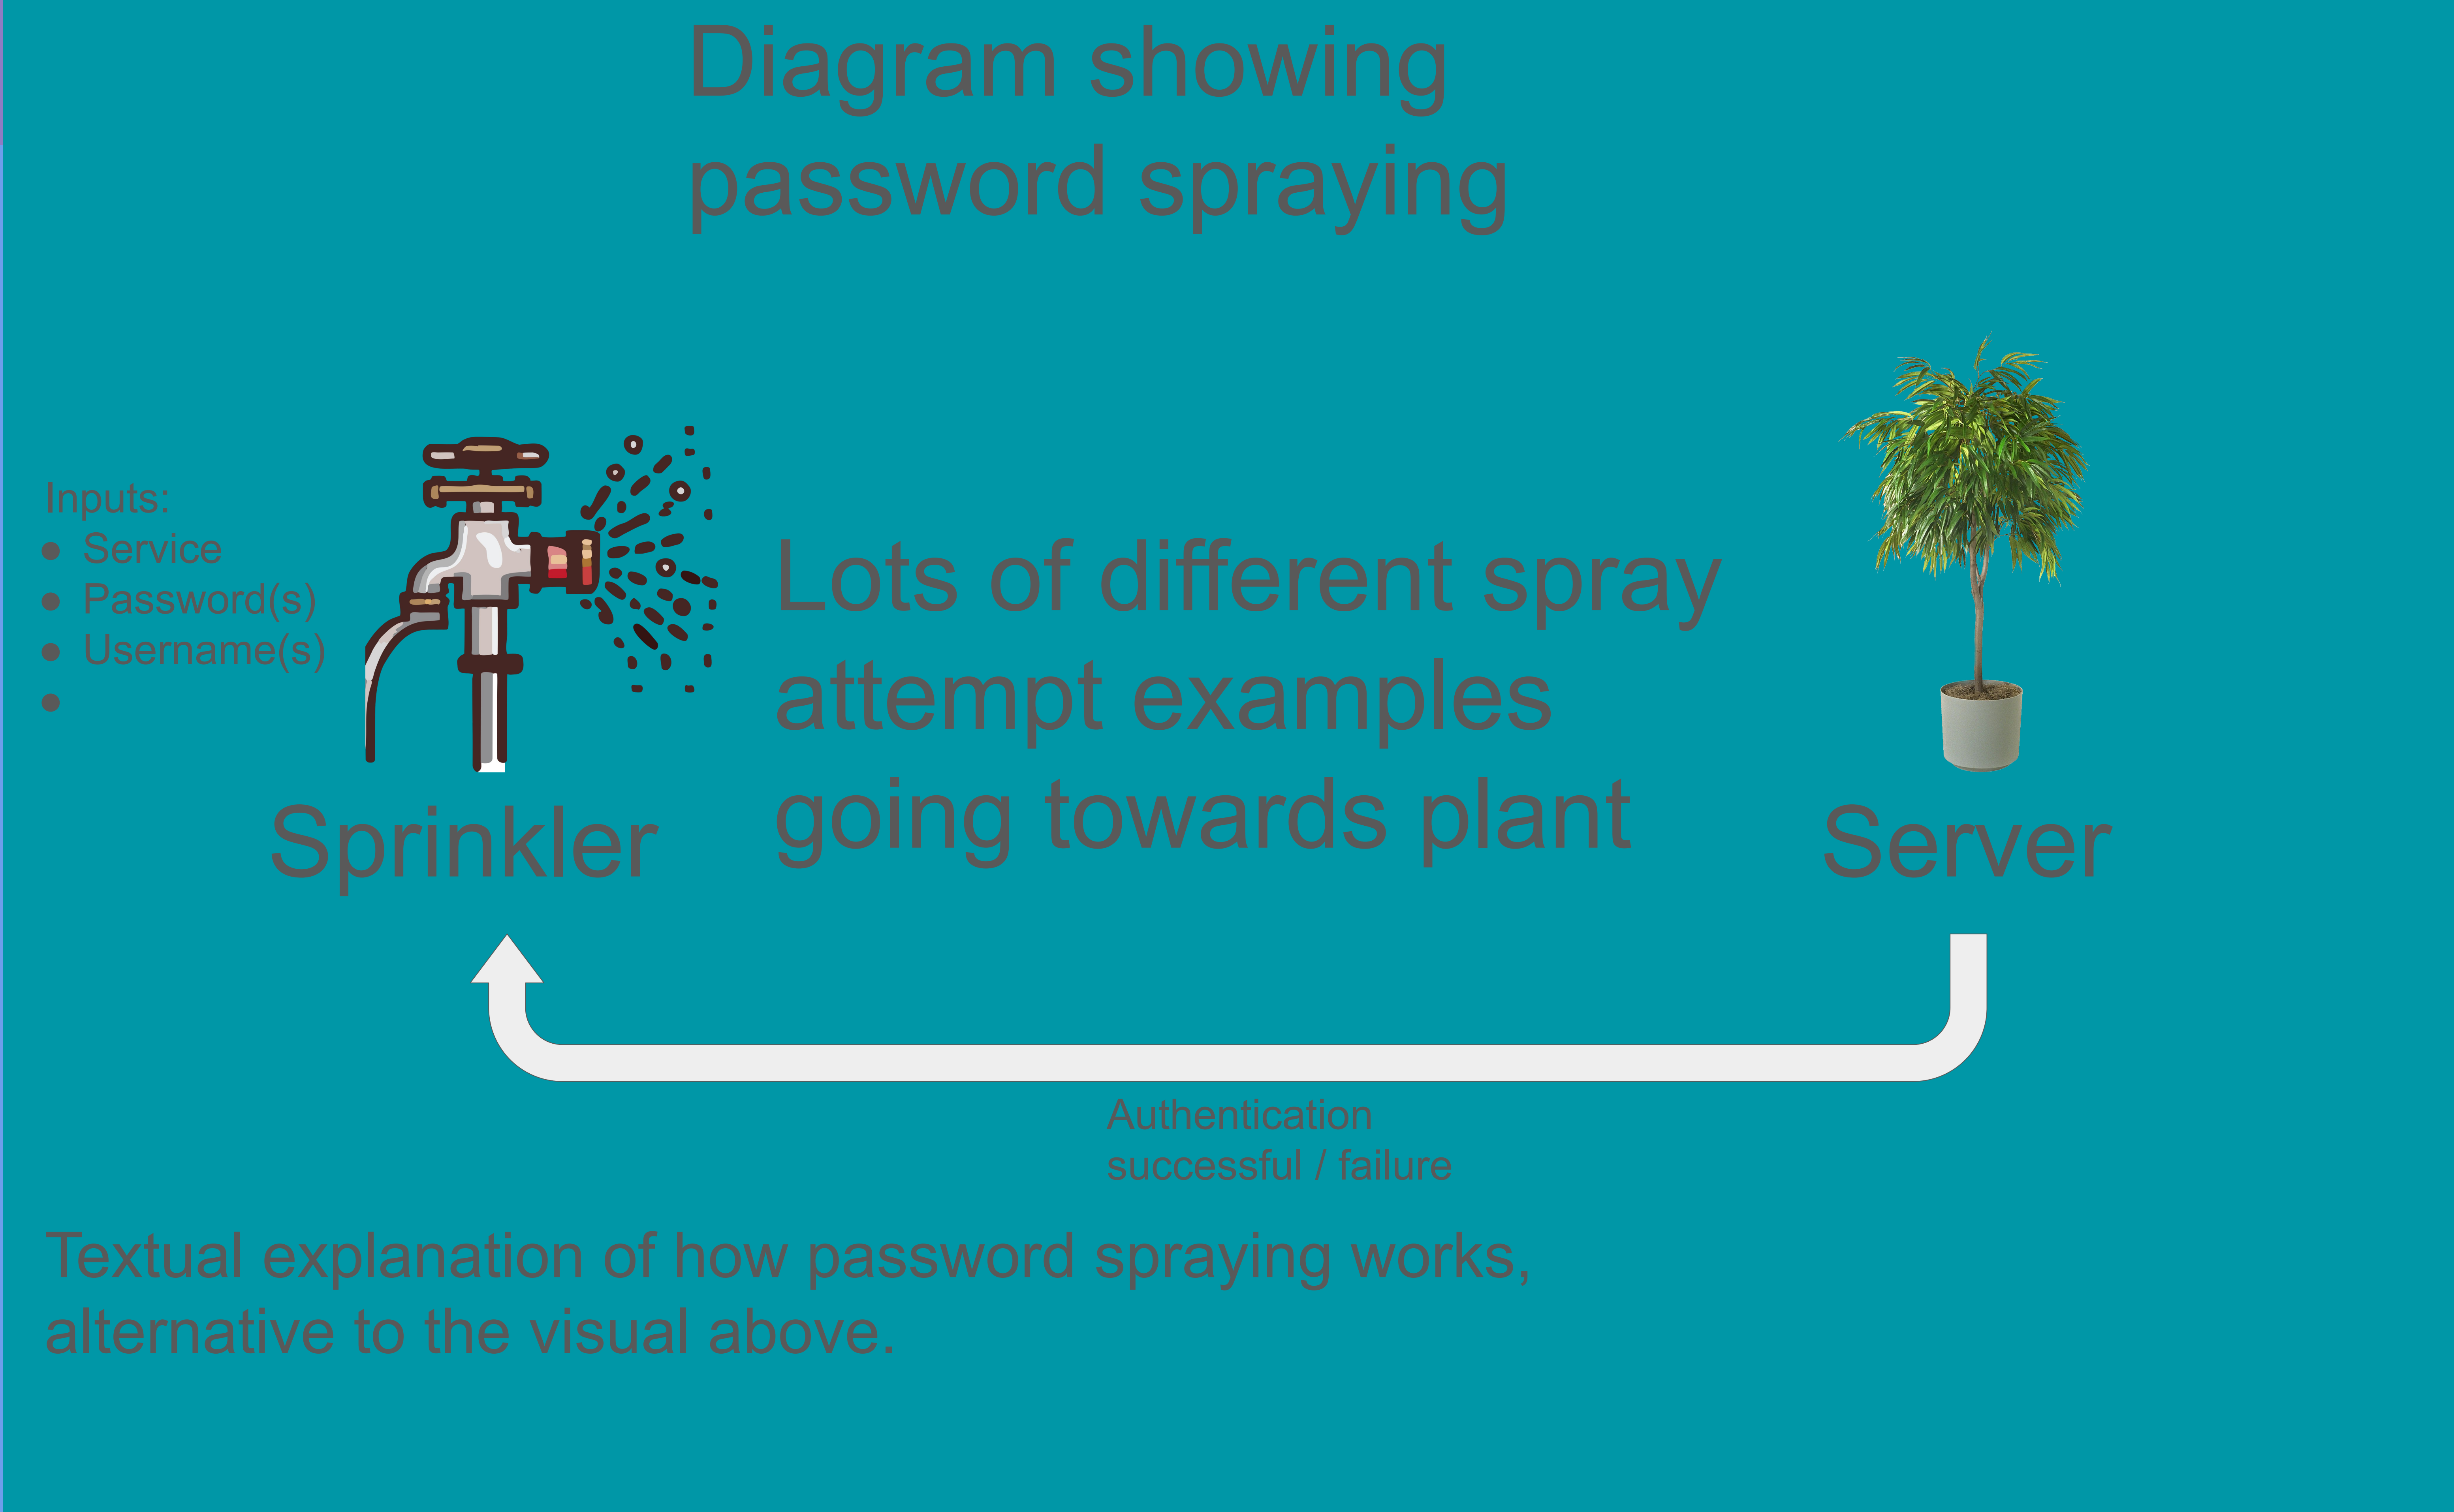

Spraying through an ssh service

Spraying through an HTTP-Get service
Basic Authentication Method:

Spraying through an HTTP-Post service
and other services we add comparability with

Output formatting and readability:
Whole lot of output, it's important to make it pretty and readable.

Visualization of password spraying with accompanying explanation.
Font probably pretty small at about 40pt.

Optimizations for speed
